

ALPINE

WARMING CREAM FOR THE COLD SEASON: HANDS AND FEET

Chilblain cream. It has a local anti-inflammatory, soothing effect and stimulates capillary and venous circulation. It is useful for relieving pain and itching.

The natural ingredients are contained in an O/W cream base obtained with a natural emulsifier. Based on **wheat proteins that promotes the penetration of the actives.**

METHOD OF USE

Apply twice a day to the affected areas (hands and feet) both during the acute and full-blown phase of chilblains as well as a preventative measure at the onset of the colder months. Avoid contact with eyes, fac, and mucous membranes; the essential. Essential oils used contain allergens.

INGREDIENTS

ST. JOHN'S WORT OIL 5%: anti-inflammatory and healing action.
