

A gel solution based on rock stone (alum) for a gentle and long-lasting antiperspirant action.

Alum is an aluminum salt that is much **less irritating and occlusive** than the standard aluminum salts used in deodorants. The astringent action is complemented by distilled witch hazel water, rich in tannins. **Aloe gel has a hydrating and soothing effect, making the product particularly gentle and suitable for even the most sensitive skin. Tea tree oil, with its antibacterial and antifungal properties, inhibits the formation of unpleasant odors caused by bacterial degradation processes.** Distilled orange blossom water softens and regenerates the skin. It has a light, fresh green tea scent that is free of allergens.

METHOD OF USE

Apply once a day.

INGREDIENTS

DISTILLED HAMAMELIS WATER 25%: astringent, tonic, and soothing.

DISTILLED ORANGE BLOSSOM WATER 25%: soothing and regenerating.

POTASSIUM ALUM 5%: antiperspirant.
